

LOUGHRAN

BREWING STORES

Brew Craic

P o d c a s t

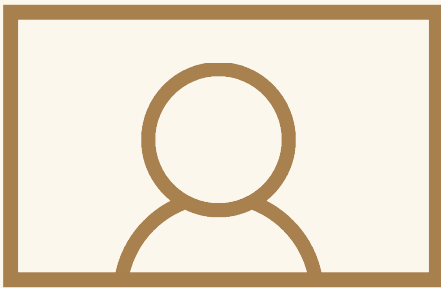

Thank you for accepting our invitation. BrewCraic Podcast is an informal conversation over video conferencing software called Zoom that's being recorded and edited for release at a later date.

Tips

We are striving to make the best possible listening experience for our audience.

Firstly, download and install the Zoom application if you have not done so already ([click here](#)) and set up your preferences ([Zoom set up video tutorial](#)). Optionally you can personalise your video stream by uploading a custom Zoom [background](#).

Video

Ensure that the camera is in front of you and you are in the middle of the frame.

Audio

If possible, wear headphones or earphones; this will keep everyone on the video conference call engaged. If your headphones have a microphone, they will provide better audio quality.

Location

Choose a room with low reverberation. Carpeted rooms with paintings are ideal as they will break up the sound waves, reduce echo and reverberations heard by the microphone. In summary, try to avoid empty spaces. In turn, our audience will listen to clear rich audio that will decrease listener fatigue.

Have fun and enjoy the conversation.
